

CSIT INTERNSHIP PROJECT PROPOSAL

Intern Requirement

No. of students required	1
Preferred Discipline	<ul style="list-style-type: none">• Computing / Computer Science• Computer Engineering
Prerequisites/ Skills Required	<ul style="list-style-type: none">• Java Programming and XML• Preferably some experience in web application development

Project Details

Title	Exploration and Assessment of Workflow Engines
Overview/Background	A workflow engine is a software application that facilitates the automation of a business process, during which documents, information or tasks are passed from one participant to another for action, according to a set of procedural rules.
Objectives/Scope/ Deliverables	<p>The aim of this project is demonstrate the capabilities of a workflow engine through the development of a web application prototype.</p> <p>The intern is expected to explore available workflow engines, assess and shortlist suitable workflow engine(s) according to the users' requirements. The selected workflow engine(s) will then be utilised in the development of a web application prototype.</p>
Project Duration	6 months
