Project Details

Title	Survey of Practical Image Steganography Techniques
Overview/Background	Steganography refers to the art and science of hiding messages in an inconspicuous medium, so that only the sender and receiver are aware of the existence of these messages. There are many tools developed for applying steganography in various media, and those for image steganography are particularly popular.
Objectives/Scope/ Deliverables	The project involves conducting a survey on publicly available image steganography software for the message hiding technique employed.
Project Duration	2-4 months
